EXPERIENCE

Verizon (Virtual) Piscataway, NJ
Network Engineer Intern June 2020 – August 2020

- Supported the team with Full Stack and E2E development of features for One Talk and My Verizon for Business app.
- Assisted in the Defect Fixes, User Story Update, UI changes, Production Testing, and Alternative Solution.
- Coordinated with Verizon India and others to configure/optimize code and document specification throughout pipeline.

Essex County College Newark, NJ
Academic Advisor | CS/ENGI/MATH July 2019 – June 2020

- Provided academic support to all students, including advisement, audit, overrides, and registration.
- Coached and inspired students with life, academic, work, or other circumstance to ensure retention
- Use of Oracle DB to create and deliver weekly, monthly, and annual reports.

Rutgers University Newark, NJ
OIT Consultant June 2019 – June 2020

- Configure, troubleshoot, and resolve networking problems across the university's network.
- Provide on-call/ hands-on support to the university community with computing-related services.
- Create, review, and resolve tickets each day in response to user service requests.

Staples Clifton, NJ
Tech Associate August 2018 – July 2019

- Conducted various on-site, in-home repairs, maintenance, and other services for customers.
- Spearheaded the marketing and sale of various technology products by employing selling behavior.
- Responded to and resolved customer requests and concerns.

PROJECTS

School Management Database (Fall 2019)

- Developed database which gives information about student, instructor, course, room, and more.
- Created tables, indexing, queries, referential integrity, triggers, and macros to create reports.

Compiler in C++ (Spring 2019)

- Lexical analyzer – from provided description of syntax of language; construct function and program.
- Implemented recursive parser and, upon successful parsing, do post order traversals & count.
- Evaluate parse tree, doing dynamic check, static check and runtime check in particular function.

Amazon Web Scraper

- Developed a tool that searches Amazon for a product along with price using python.
- Search results are stored in a separate database file and shown to the user.
